University of New Brunswick
Faculty of Computer Science
Co-op Program

Professional Log

Student Name: Brad Touesnard

Month & Year	Record of Work Activity (minimum of one entry per month)	Verification
September 2002	- Read documentation and tutorials on VoiceXML and Java Servlets to be able to understand the voice application developed by the previous co-op student. - Familiarized myself with the voice application and developed some small amounts of code. - Replaced small database used in development of the voice application with a large "real-world" database to explore scalability issues.	Initials: _____
October 2002	- Worked with the database, stripping strings of unsupported characters and shortening them to accommodate speech recognition. - Drafted a Control Flow Diagram and a Command Scope Diagram of the voice application to better understand the system and its flaws. - Changed the voice application navigation to enhance usability with the larger database. - Gained more knowledge about speech technology by reading online articles and hosting regular meetings. - Became much more familiar with the VoiceXML and Java Servlet code from constant use.	Initials: _____
November 2002	- Drafted a survey proposal to explore usability issues with the voice application. - Compiled a summary of test results obtained up until the end of October. - Presented the voice application to some grade nine students from FHS. - Researched Voice Gateways and Voice-Over-IP solutions for submission of a funding proposal for a local voice application server.	Initials: _____
December 2002	- adf	Initials: _____

IT Professional Supervisor:	Name (printed):
Please verify that the work activities listed are complete and accurate before initialing beside the LAST line of each month's entries.	Signature:
